

If you are having problems with opening chm file from network drive follow the steps below:

1. Open computer Registry from menu start\run\regedit
2. Go to the location below  
HKEY\_LOCAL\_MACHINE\SOFTWARE\Microsoft\HTMLHelp\1.x\ItssRestrictions\MaxAllowedZone
3. Set value to "1"
4. Quit registry

**If you cannot find ItssRestrictions it has to be created.**

1. Right click on 1.x then "new"\key\ItssRestrictions and press enter
2. Then on "ItssRestrictions" right click\new\value DWORD\type MaxAllowedZone and press enter.
3. Set value to "1".
4. Quit registry

Alternatively you can simply copy chm file to your local drive and launch it.
